-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-8 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Dupre et al

The reference discloses the phenol-formaldehyde resin may be prepared by reacting a molar excess of formaldehyde with phenol under alkaline reaction conditions, with an amount of between 0.5 and 4.5 moles per mole of phenol (see col. 8, lines 35-42; 1.2-3.5 (see col. 12, lines 59-61); the pH is from about 3.5-8.9 (see col. 13, line 6, solids content range from about 50% up to 75+% , viscosities can range from less than 100 cps to over 1000 cps (see col. 13, lines 26-29).

The disclosure of the reference differs from the instant claims in that it does not disclose the claimed characteristics such as nitrogen content of from 0 to 3% nor the alkalinity of from about 4 to 15.

Art Unit: 1711

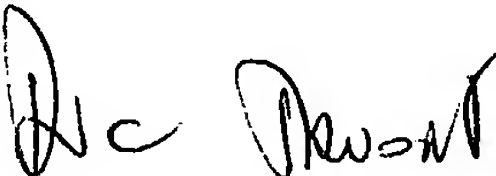

However, the reference does disclose the claimed phenol-formaldehyde resin with overlapped molar ratio, overlapped viscosity, overlapped solids content and overlapped pH. In view of this similarity, it would appear to be inherent that the product, a phenol-formaldehyde resin, having the claimed nitrogen content and the claimed alkalinity could be prepared following the teachings of the reference. (See *In re Best*, 195 USPQ 430, 433 (CCPA 1977)).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Duc Truong whose telephone number is 571-272-1081. The examiner can normally be reached on Monday-Friday.
